

MASTER OF NURSING PROGRAMME

Our School

The Nethersole School of Nursing of the Faculty of Medicine at The Chinese University of Hong Kong has a proud and successful history of providing undergraduate and postgraduate nursing education at par with international standards.

Our Mission in Education

To excel in the provision of high-quality nursing education.

Programme Description

The Master of Nursing Programme is a clinically-based programme aiming to equip graduate nurses with the knowledge and competencies to incorporate theories and concepts of nursing science and the leadership and management skills into advanced nursing practice in a clinical specialty. The programme emphasises the development and utilisation of evidence-based knowledge, advanced clinical skills and management and leadership skills. It also prepares students to pursue nursing career advancement or postgraduate studies at a doctoral level.

ADVANTAGES OF STUDYING AT THE NETHERSOLE SCHOOL OF NURSING, CUHK

Obtaining a postgraduate qualification in nursing from an internationally renowned university

Studying in an established school of nursing with national and international links

Receiving education from academic staff who are experienced in various clinical areas and in research

Studying in a friendly and stimulating environment conducive to effective learning and personal growth, with the support of helpful academic staff

Opportunity to attend seminars given by international scholars in nursing and other disciplines

Unique experience of a vibrant university life with the opportunity to participate in various social and academic activities

Availability of various scholarships and awards to encourage students to strive for excellence

Programme Structure

The programme curriculum is specifically designed to prepare students for advanced nursing practice in a selected clinical specialty. In addition to courses covering a range of issues related to management and leadership, clinical reasoning and advanced nursing practice, students are also required to complete a supervised scholarly inquiry project on a research or service innovation topic in a selected area of clinical specialty.

Core Courses (17 units)

Course	Unit(s)
